Mali

Malaria is a disease caused by parasites transmitted to humans through the bite of an *Anopheles* mosquito. If left untreated, its flu-like symptoms—fever, headache, fatigue, shivering, nausea and vomiting—can lead to coma and death. Approximately half of the world’s population is at risk of malaria. Malaria kills a child in Africa every minute and nearly 655,000 people annually. More than 90% of malaria deaths occur in Africa, mostly children under five years of age. Malaria costs the continent at least US \$12 billion in lost productivity every year. Malaria is preventable and treatable. Simple tools like insecticide-treated nets, effective medicines and safe indoor spraying can save lives.

Founded ahead of the 2010 World Cup in South Africa, United Against Malaria (UAM) is an alliance of football teams, celebrities, health and advocacy organizations, governments and corporations that have united together against malaria. As part of the Roll Back Malaria (RBM) Partnership, UAM is made up of over 200 partners from diverse sectors and continents who invest their experience, time, funds, skills and enthusiasm because they share a common goal: to end malaria deaths by 2015.

Africa's top footballers join the fight against malaria

To prevent malaria in his hometown, Ivorian footballer **Gervinho** donated hundreds of insecticide-treated bednets to an orphanage in Abobo, Côte d'Ivoire. He urged children and community members to sleep under the nets every night. He also appeared in a PSA, just like fellow Ivorians Didier Drogba and Kolo Touré.

The continent's best footballers are reaching out to fans to kick malaria out of Africa. Since the 2010 World Cup in South Africa, stars from Benin, Cameroon, Cote d'Ivoire, Equatorial Guinea, Ghana, Malawi, Mali, Nigeria, Senegal, South Africa, Tanzania, Uganda and Zambia have appeared in public service announcements (PSAs) and on billboards. Their message: **Protect yourself and your family from malaria.**

At left, **Chris Katongo**, captain of the Zambia team (shown with the Minister of Health), has starred in PSAs for UAM. "As a team we are well aware of the dangers of malaria," Katongo says. "If one of us falls ill from the disease he is not able to play and the whole squad suffers. That's why it's critical that we all do our part to fight this preventable disease."

Super Eagles captain **Joseph Yobo** led his team to victory over Liberia to qualify for AFCON 2013. He also led his team to become UAM champions in Nigeria, which suffers heavily from malaria. "Having malaria as a top footballer can be a challenge to my career," he says. "This is why I make sure I and my family sleep inside insecticide-treated nets to protect us from malaria."

Above, from left to right: **Samuel Eto'o** of Cameroon, **Asamoah Gyan** and the Ghana Black Stars, and **Steven Pienaar** of South Africa have appeared in PSAs.

Every **60** seconds, a child in Africa dies of malaria. That's **90** in the course of a regulation football match.

"I know it seems crazy, but we just HAVE to win."

Coaches' tips: Stay in the game. Protect yourself and your family from malaria.

Sleep under a long-lasting insecticide-treated net every night.

At first sign of fever, go to a health center for testing and treatment.

Pregnant women should seek antenatal care early.

If available in your area, participate in indoor residual spraying campaigns.

Degu Debebe
Ethiopia captain,
UAM champion

United Against Malaria thanks and recognizes the following football champions who have supported the campaign: Louis Delgado, Angola • Ze Kalanga, Angola Kali, Angola • Ogunbiyi Muri Ola, Benin • David Djigla, Benin • Koukou Djiman, Benin • Bakari Kone, Burkina Faso • Charles Kabore, Burkina Faso • Samuel Eto'o, Cameroon • Stephane Mbia Etoundi, Cameroon • Joseph Antoine Bell, Cameroon • Prince Oniangue, Republic of the Congo • Didier Drogba, Côte d'Ivoire • Gervinho, Côte d'Ivoire • Emmanuel Eboué, Côte d'Ivoire • Kader Keita, Côte d'Ivoire • Boubacar Barry Copa, Côte d'Ivoire • Bakari Kone, Côte d'Ivoire • Kolo Toure, Côte d'Ivoire (**continued, pgs 6-7**)

Top 10 African footballers of all time

1. George Oppong Weah, Liberia
2. Abedi Pele, Ghana
3. Roger Milla, Cameroon
4. Samuel Eto'o, Cameroon
5. Didier Drogba, Cote d'Ivoire
6. Dolmi Abdel Majod, Morocco
7. Kalusha Bwalya, Zambia
8. Samuel Osei-Kuffuor, Ghana
9. Nwankwo Kanu, Nigeria
10. Jay-Jay Okocha, Nigeria

Do you agree? Let us know (and give us your top 10) at www.facebook.com/unitedagainstmalaria.

"I have been a victim of malaria and have witnessed first-hand the devastating effects it can have on individuals and families. We need malaria out of the game. Using the popularity of football to increase awareness of prevention and treatment methods will go a long way in the fight to show malaria the red card."

Didier Drogba
Côte d'Ivoire national team captain and UAM champion

"Across the continent, football dominates the hearts and minds of children and parents alike. So does malaria—the cause of 174 million illnesses and 655,000 deaths every year. We have united to utilize the power of football to fight malaria, and we hope our fans will join us."

Samuel Eto'o
Cameroon national team captain and UAM champion

Leading the fight: CAF & ALMA

Issa Hayatou,
President, Confederation
of African Football

The Confederation of African Football (CAF), which oversees the football activities of 54 African countries, believes that for Africa to compete on the global football pitch, it must have players and communities that are free from malaria. That's why it named UAM an official social program of the 2013 Orange Africa Cup of Nations. CAF's commitment to raise awareness about malaria through football, and to increase the fight against this devastating disease, represents an unprecedented opportunity to reach football fans across the continent.

Joining CAF, the political leadership and private sector in Africa will also play a greater role in stopping global malaria deaths, 91% of which occur in Africa. President Ellen Johnson Sirleaf of Liberia (right, in blue), received a UAM "Golden Boot" award for her leadership of the African Leaders Malaria Alliance.

"When we all fight malaria together, we build stronger nations and save lives," she said. "As a football fan myself, I understand the game's power and popularity. We have the tools to win against malaria, and I urge others to join us in the fight."

President Ellen Johnson Sirleaf
Chair of the African Leaders Malaria Alliance

Big challenges, big wins: **federation presidents talk malaria and football**

Kwesi Nyantakyi
Ghana Football Association

"Our national team and local clubs have often used their games and the popularity of football at large to spread malaria prevention messages. Everyone in Ghana loves football, and everyone needs to be protected from malaria. Let's win the 2013 Orange Africa Cup of Nations; let's win the fight against malaria! We know our engagement in malaria control has helped remind our leaders of the need to strengthen their commitment to this course and accelerate successes in fighting this disease."

Leodegar Tenga
Tanzania Football Federation

"I am positive our success on the football field has been severely held back by malaria. More importantly, though, is the impact malaria has on our friends and families. I believe it is our duty as national football teams to do all we can to help stop deaths from this disease. I would ask my counterparts to do just one thing this year, help educate the public on the dangers of malaria."

Kirsten Nematandani
South African Football Association

"We in South Africa are joining the ranks of a handful of African countries that are on the track for pre-elimination of malaria. We look forward to be of service to South Africa by throwing our support behind the United Against Malaria campaign, an official cause of the 2013 Orange Africa Cup of Nations. We hope that South Africa will be blanketed with malaria control messages during the tournament to give our fight a boost to reach our target. We are proud to join CAF to endorse United Against Malaria. Let me also say that the South African team aims for a great showing at the tournament."

Kalusha Bwalya
Zambia Football Federation

"Zambia is on the road to malaria elimination. I know that quick proper malaria treatment at a hospital or health center is very important. My players are protected and healthy. We are ready to keep the title at the 2013 Orange Africa Cup of Nations!"

Augustin Sidy Diallo
Fédération Ivoirienne de Football
(Côte d'Ivoire)

"Malaria is a bane that affects our continent. It is each African's duty to rally to the cause of its eradication. Together, Unicef and United Against Malaria are launching a campaign during the 2013 Orange Africa Cup of Nations to encourage the use of long-lasting insecticide-treated nets. The Ivoirian Football Federation and the Elephants of Côte d'Ivoire support this action to win the game of life against malaria."

United Against Malaria thanks and recognizes the following football champions who have supported the campaign:

Yaya Toure, Côte d'Ivoire • Salomon Kalou, Côte d'Ivoire • Laurent Pokou, Côte d'Ivoire • Muteba Kidiaba, DR Congo • Marcel Mbayo Kibemba, DR Congo
Rodolfo Bodipo, Equatorial Guinea • Degu Debebe, Ethiopia • Jordan Ayew, Ghana • André Ayew, Ghana • Asamoah Gyan, Ghana
Michael Essien, Ghana • Stephen Appiah, Ghana • Denis Olliech, Kenya • Chiukepo Msowoya, Malawi • Frederic Oumar Kanoute, Mali

Know your foe

Take this quiz to test your knowledge

1. What should you do when you have a fever?

- Assume you have malaria and take malaria medication
- Get tested for malaria
- Stay in bed
- Do nothing until you are really sick

2. When you have malaria, which of the following aspects of your life are affected?

- Health and well-being
- School or work attendance
- Personal finances
- All of the above

3. Who is most likely to suffer most from malaria?

- Men
- Pregnant women
- Children under 5
- b and c

4. When should you use your nets?

- Rainy season
- Dry season
- Every night
- All of the above

5. What transmits malaria?

- Anopheles* mosquito
- Standing water
- Beer
- Unclean environment

6. How can you prevent and treat malaria?

- Sleep under a long-lasting insecticide-treated net every night
- Go to a health center at first signs of fever
- Complete your entire dose of malaria medication
- All of the above

7. Why must pregnant women go to a health center at least two times during their pregnancy?

- They will need to show the nurses they can still walk
- They will be given a mosquito net
- They will be given SP to prevent malaria in their unborn baby
- b and c

Bonus question: Name the past five champions of the Africa Cup of Nations.

André Ayew,
Ghana footballer,
UAM champion

Quiz answers: 1. b 2. d 3. d 4. d 5. a 6. d 7. d 8. Zambia, 2012 • Egypt, 2010 • Egypt, 2008 • Egypt, 2006 • Tunisia, 2004

Juma Kaseja
Tanzania captain,
UAM champion

Captain's Corner

A long-lasting insecticide-treated net can provide protection against mosquitoes for up to four years, but in the same way that football players need to maintain their strength and skills on the pitch, the net must be kept in good condition to be effective.

Remember, repairing torn nets is the duty of all parents and adults. Nobody is too big for malaria or too big to repair a net.

Didier Drogba
Cote d'Ivoire captain,
UAM champion

How do I care for my net?

- When not in use, roll up or tie up the net, and keep it out of children's reach.
- Do not soil your net with food to avoid attracting rats.
- Inspect your net regularly for small holes.
- Hang the net with care, and avoid hanging it against rough or sharp surfaces.
- Enter the net carefully every night.
- Do not re-treat your net. Nets distributed in the past 5 years are long-lasting insecticide-treated nets and do not need to be retreated, even after washing.

How do I repair my net?

- Inspect nets often to find any small holes.
- Do not wait for small holes in your net to get bigger, repair holes immediately. Small tears are easier to repair than big ones.
- To repair a net you can stitch, patch or tie the holes and tears.
- You can stitch holes and tears using a simple needle and thread.
- You can patch holes and tears using any cloth material and a simple needle and thread.
- You can also tie a knot in tears and holes to close them.

Adama Coulibaly, Mali • Seydou Keita, Mali • Bakaye Traoure, Mali • Momo Sissoko, Mali • Souleymane Diamountene, Mali • Chicinho Conde, Mozambique
Joseph Yobo, Nigeria • Ismaelo Taye Taiwo, Nigeria • Victor Moses, Nigeria • Vincent Enyeama, Nigeria • Moussa Sow, Senegal
Souleymane Diawara, Senegal • Steven Pienaar, South Africa • Mark Fish, South Africa • Shaun Bartlett, South Africa
John Bocco, Tanzania • Kigi Makasi, Tanzania • Shabdan Nditi, Tanzania • Juma Kaseja, Tanzania • Andrew Mwisigwa, Uganda • Chris Katongo, Zambia

We have the tools and the momentum.
Now we need **you.**

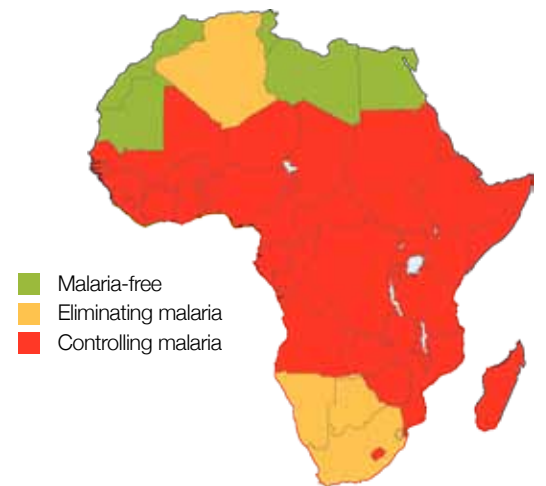

Clockwise, from top left:
Emmanuel Adebayor, Togo team captain; **Moussa Maâzou**, Niger team captain; **Gervinho**, Cote d'Ivoire footballer; **Charles Kabore**, Burkina Faso team captain; **Bongani Khumalo**, South Africa team captain

Below, right:
Lomana LuaLua, DR Congo

Shrinking the malaria map

Several African countries are on their way to eliminating malaria, including South Africa, Namibia and Botswana. Others, such as Ethiopia, Lesotho, Rwanda, Senegal and Zambia have come far.
